More information

Main characteristics of the security release locks:

- Significant increase in the degree of home protection.

When the door is closed, a bolt is automatically extended which connects the mechanical part (door leaf) with the electrical part of the lock (door frame). Preventing the opening by card systems or similar.
Dimensions:

Multiple door opening options:

- From an apartment through the video door entry device.
- From inside the entrance hall through the door handle.
- From the outside with a key or by activating any of the access control devices (numeric code, proximity, etc.).
