

Intelligent cities and exhibition conference 2017, Cairo

The third edition of **Intelligent cities and exhibition conference** took place on 23rd and 24th October in Cairo, Egypt. Golmar took part together with its local partner Tahoon Technology, with which has established the brand Golmar in Cairo for the last 5 years.

Golmar exhibited the latest news on GB2 technology, the 2 wires non-polarized BUS from Golmar. Monitors like **Pentha**, **Vesta 7**, **Vesta 2** or even the handsfree audio unit **Nhea** caught the attention of the visitors.

In this venue it was scheduled a conference titled "The intercom DNA", where the latest trends on Video intercoms and future proof technologies, like the new IP video intercom were presented. It was a great opportunity to present the latest developments on the IP range, like the new **Beoview 7** which has been installed in projects so representative like **Maslak 1453** or **Sea Pearl** in Turkey.

We would like to thank all visitors who approached our stand and wish to meet you again.
