

New THERMARP Yokis Chrono-thermostat

New THERMARP Yokis Chrono-thermostat, with touch screen, and weekly programming with 3 adjustable temperature levels.

It incorporates radio module, for integration into the Yokis ecosystem if it is desired.

Easy operation, local and remote operation through the Yokis YnO application.

You can visualize the operation of the thermostat in the YnO app from [here](#).

Thanks to its internal relay it is also possible to make it work stand-alone, like any other thermostat on the market.
